

3.1 Systems of Measurement

Name: key

Investigate:

What is perimeter?

Sum of the lengths of all sides of a polygon
(add)

What is the perimeter of this figure? What assumptions do you have to make?

Must assume parallel lines are the same length

$$P = 7 + 7 + 12 + 12 = 38 \text{ cm}$$

or

$$P = 2(7 + 12) = 2(19) = \boxed{38 \text{ cm}}$$

What is the distance around a circle called?

Circumference

Label the diameter and the radius of the circle. Calculate the distance around the circle. $C = 2\pi r$

$$r = 2.4 \text{ cm}$$

$$C = 2\pi r$$
$$= 2\pi(2.4)$$
$$= \boxed{15.1 \text{ cm}}$$

Examples:

Ex 1. What is the perimeter of this figure?

$$P = 4.4 + 2.6 + 2.0 + 2.1 + 2.2 + 2.8 + 4.2$$
$$= \boxed{20.3 \text{ cm}}$$

Ex 2. The sides of the flower garden shown below are 4m long. Each end is a semi-circle with a diameter of 2m. What is the perimeter of the flower garden?

$$P_0 = C = \pi d$$

$$= \pi(2)$$

$$= 6.28m$$

$$P = 6.28 + 4 + 4 = \boxed{14.28m}$$

Ex 3. Wilhelmina, a seamstress, is sewing bridesmaids' dresses. Each dress requires $3\frac{3}{4}$ yards of silk and $1\frac{1}{2}$ yards of lace fabric. How much of each type of material does Wilhelmina need to make 5 dresses?

$$3\frac{3}{4} = 3.75 \quad \text{silk: } 3.75 \times 5 = \boxed{18.75yd}$$

$$1\frac{1}{2} = 1.5 \quad \text{lace: } 1.5 \times 5 = \boxed{7.5yd}$$

Ex 4. Fatima is trying to calculate how much baseboard she will need for the room shown below. What is the minimum amount of baseboard she will need?

$$11' 8'' + 44' = \boxed{55' 8''}$$

ft	inches
	9
5	2
	27
	27
6	6
9	2
15	8
	24
	24
9	9
9	2
44'	140"

Convert
inches \rightarrow feet

$140'' = \underline{\quad}'$

$140'' \times \frac{1'}{12''} = 11.\bar{6}$

$11 \times 12 = 132$

$140 - 132 = 8$

11' 8"
